Version with Markings to Show Changes Made

- 6. A marker system comprising:
 - an elongate catheter body;
 - an expandable member attached to a distal end of the catheter body; and opaque markers positioned on the expandable member.
- 7. The marker system of claim 6 wherein the expandable member is a balloon in fluid communication with the catheter body.
- 8. The marker system of claim 6 wherein the markers are opaque to light.
- 9. The marker system of claim 8 wherein the markers are opaque to visible light.
- 10. (Canceled) The marker system of claim 8 wherein the markers are opaque to infrared light.
- 11. (Canceled) The marker system of claim 8 wherein the markers are opaque to ultraviolet light.
- 12. The marker system of claim 6 wherein the opaque markers are arranged in a pattern.
- 13. The marker system of claim 12 wherein the pattern forms a measuring index.
- 14. The marker system of claim 13 wherein the measuring index comprises a topographical index.
- 15. The marker system of claim 6 wherein the opaque markers comprise an ink.

- 06/26/03 THU 16:05 FAX 763 494 2180
 - The marker system of claim 15 wherein the ink is fluorescent. 16.
 - The marker system of claim 16 wherein the ink is phosphorescent. 17.
 - A balloon catheter comprising: 18.

an elongate shaft having a lumen therein;

a balloon attached to a distal end of the shaft and in fluid communication with the balloon; and

a means for marking positioned on the balloon.

- The means for marking of claim 18 further comprising opaque patterns. 19.
- The means for marking of claim 18 further comprising patterns which are opaque 20. to light.
- The means for marking of claim 20 further comprising patterns which are opaque 21. to visible light.
- 22. (Canceled) The means for marking of claim 20 further comprising patterns which are opaque to infrared light.
- 23. (Canceled) The means for marking of claim 20 further comprising patterns which are opaque to ultraviolet light.
- 24. The means for marking of claim 18 further comprising ink.
- 25. The means for marking of claim 24 wherein the ink is fluorescent.
- 26. The means for marking of claim 24 wherein the ink is phosphorescent.
- 27. A method comprising:

inserting a catheter into a human body, the catheter comprising a shaft, a balloon mounted on a distal end of the shaft, and markers on the balloon; advancing the balloon to a treatment site; and visualizing the balloon relative to the human body using the markers.

- 28. The method of claim 27 wherein the step of visualizing the balloon relative to the human body further comprises using light.
- 29. The method of claim 28 wherein the step of visualizing the balloon relative to the human body further comprises using visible light.
- 30. The method of claim 28 wherein the step of visualizing the balloon relative to the human body further comprises using fluorescent light.
- 31. The method of claim 28 wherein the step of visualizing the balloon relative to the human body further comprises using infrared light.
- 32. The method of claim 28 wherein the step of visualizing the balloon relative to the human body further comprises using ultraviolet light.
- 33. The method of claim 27 wherein the markers further comprise a pattern of ink.
- The method of claim 33 wherein the ink is fluorescent. 34.
- 35. The method of claim 33 wherein the ink is phosphorescent.
- 36. The method of claim 27 wherein the markers comprise a measuring index.
- 37. The method of claim 36 further comprising using the measuring index to determine a parameter of the human body or the balloon.

- THU 16:06 FAX 763 494
 - The method of claim 37 wherein the parameter is the diameter of the balloon. 38.
 - The method of claim 37 wherein the parameter is the topography of a body 39. vessel.
 - 40. The method of claim 37 wherein the parameter is the geometry of a restriction in a body vessel.
 - The method of claim 27 wherein the step of visualizing the human body further 41. comprises inserting a visualization device into the catheter.

THU 16:06 FAX 763 494 2180

The method of claim 41 wherein the visualization device comprises an 42. angioscope.
